

In The Specification:

The Specification was amended to add headings, and correct punctuation, to comply with US patent practice. Also, Figures were removed from the text of the Specification and listed separately as Figures, and a Brief Description of the Drawings added. It is believed no new matter was added by these amendments.

The following claim of priority is added at the beginning of the application: "This application claims benefit, under U.S.C. §119 or §365 of French Application Number 02/15852, filed December 13, 2002; and PCT/FR2003/003669 filed December 11, 2003."

The Abstract found on the face of the PCT/FR03/003669 patent application (Published as WO 2004/055071) was added as the last page of the Specification.

References to foreign patents and patent applications were substituted with the US equivalent, where available.

A Substitute Specification is attached incorporating these amendments.
